

REMARKS

The specification has been amended as needed.

The claims have been amended as to form.

Reconsideration is respectfully requested, for the rejection of the claims as anticipated by or unpatentable over WU 6,478,655.

Incidentally, the Examiner's provision of a marked copy of Figure 2 of WU was extremely helpful. This is patent examining at its very best!

However, WU does not disclose nor make obvious the invention as now claimed.

Specifically, there cannot be located in WU anything corresponding to our trailing arm pivoted for vertical swinging movement by a pivot at one end and having a horizontal hole therethrough receiving the axle of the rear wheels, at the outer end, with an adjustable screw and a stepped portion of a hole extending vertically through the middle of the trailing arm. This structure patentably characterizes the two independent claims 1 and 7 of the present application, and is now clearly recited in the claims as amended. Therefore, these claims are thus patentably distinguished from WU, and with them the claims that depend therefrom and which recite further features of structural novelty of the present invention.

In view of the present amendment and the foregoing remarks, therefore, it is believed that the present application has been placed in condition for allowance, and reconsideration and allowance are respectfully requested.

The Commissioner is hereby authorized in this, concurrent, and future replies, to charge payment or credit any overpayment to Deposit Account No. 25-0120 for any additional fees required under 37 C.F.R. § 1.16 or under 37 C.F.R. § 1.17.

Respectfully submitted,

YOUNG & THOMPSON
